Management Education in India has an intense magnetic effect on students and parents alike. The placement figures often tend to drive the community to flock towards acquiring a post-graduate degree in management in search of a bright future. As compared to the other professional courses in engineering, medicine, etc. the role of management education has moved beyond transfer of academic knowledge for professional excellence to creating and transforming personality of students demonstrating confidence with character. The expectation from management graduates extend beyond concepts and include skill-sets which are contextual and application oriented. A two-year exposure is expected to convert a studious student into a confident communicator, knowledgeable manager and ethical citizen. Companies too are focussing on skill-sets such as communication, team management and general awareness, behavioural compatibility, domain knowledge, emotional quotient and intelligence quotient. The programmes offered by B-schools, therefore, must project the same by enabling an interactive system of pedagogy, opportunity for expression, varying evaluation from a subjective and descriptive approach to an application oriented assessment system and provide opportunity for enhancing written and spoken communication skill. This would entail a change in approach to teaching from a teacher driven top-down approach to a student driven bottom-up approach and adoption of Socratic methods of discussion. Concern for community and commitment to society needs to be instilled, hence socially-relevant programmes need to be part of the curriculum. For management schools, it is not just about admissions, teaching and placement, it is also about creating lifelong alliances with students and a bonding that becomes irrevocable.

- 23.** Which of the following statements is NOT true as per the passage?
- Academic knowledge of management subjects alone is adequate to do well
